THE JOURNAL OF Supercritical Fluids

Subject Index

Amine
Ammonolysis with supercritical NH_3 157
Ammonia
Ammonolysis with supercritical NH_3 157
Ammonolysis
Ammonolysis with supercritical NH_3 157
Antibiotic
Solubility of the antibiotic Penicillin G in supercritical carbon dioxide 183
Association models
Solid–liquid–gas equilibrium by cubic equations of state and association 97
1-Butanol
Supercritical fluid extraction of 1-butanol from aqueous solutions 245
Camphor
Phase behaviour of essential oil components in supercritical carbon dioxide 117
Carbon dioxide
Supercritical fluid extraction of 1-butanol from aqueous solutions 245
Catalysts
Supercritical antisolvent precipitation of micro- and nano-particles 1
Coloring matter
Supercritical antisolvent precipitation of micro- and nano-particles 1
Corrosion
Factors controlling corrosion in high-temperature aqueous solutions: a contribution to the dissociation and solubility data influencing corrosion processes 205
Cosolvent
Thermodynamic studies of chemical equilibrium in supercritical carbon dioxide-cosolvent solutions using UV-Vis spectroscopy 135
DAC
Phase behavior and reaction of polyethylene terephthalate–water systems at pressures up to 173 MPa and temperatures up to 490C 229
Density
High-pressure density and viscosity of polystyrene solutions in methylcyclohexane 261
Deuteration
Deuteration of hexane by ^2HCl in supercritical deuterium oxide 165
Dissociation
Factors controlling corrosion in high-temperature aqueous solutions: a contribution to the dissociation and solubility data influencing corrosion processes 205
Elementary reactions
Modelling of the pyrolysis of tert-butylbenzene in supercritical water 191
Energy analysis
Energy analysis of supercritical carbon dioxide extraction processes 145
Enhancement factor
Partition coefficients of aromatic organic substances in two-phase mixtures of water and carbon dioxide at pressures from 8 to 30 MPa and at temperatures of 313 to 333 K. Part II 109
Enthalpy of hydration
Partition coefficients of aromatic organic substances in two-phase mixtures of water and carbon dioxide at pressures from 8 to 30 MPa and at temperatures of 313 to 333 K. Part II 109
Equation of state
Solid–liquid–gas equilibrium by cubic equations of state and association 97
The density of hydrogen fluoride at high pressures to 973 K and 200 MPa 127
Solubility of the antibiotic Penicillin G in supercritical carbon dioxide 183
Essential oil
Extraction of essential oil and lipids from nutmeg by liquid carbon dioxide 253
Explosives
Supercritical antisolvent precipitation of micro- and nano-particles 1
Extraction
Supercritical CO_2 extraction of the main constituents of lovage (*Levisticum officinale* Koch.) essential oil in model systems and overground botanical parts of the plant 51
Extraction of essential oil and lipids from nutmeg by liquid carbon dioxide 253
Fatty acid ethyl esters
Phase equilibrium of fish oil ethyl esters with supercritical carbon dioxide 35
Fatty oil
Extraction of essential oil and lipids from nutmeg by liquid carbon dioxide 253
Fenchone
Phase behaviour of essential oil components in supercritical carbon dioxide 117

Free radical
Modelling of the pyrolysis of tert-butylbenzene in supercritical water 191
Fuorinated polymers
Supercritical CO_2 as a solvent for polymeric stone protective materials 173
^2HCl
Deuteration of hexane by ^2HCl in supercritical deuterium oxide 165
Hexane
Deuteration of hexane by ^2HCl in supercritical deuterium oxide 165
High-pressure
High-pressure density and viscosity of polystyrene solutions in methylcyclohexane 261
High pressure
The density of hydrogen fluoride at high pressures to 973 K and 200 MPa 127
Modelling of the pyrolysis of tert-butylbenzene in supercritical water 191
High temperature
The density of hydrogen fluoride at high pressures to 973 K and 200 MPa 127
Hydrocarbons
Modelling of the pyrolysis of tert-butylbenzene in supercritical water 191
Hydroformylation
Determination of selectivity for parallel reactions in supercritical fluids 63
Hydrogen bonding
Raman spectroscopic studies on hydrogen bonding in methanol and methanol/water mixtures under high temperature and pressure 73
Hydrogen fluoride
The density of hydrogen fluoride at high pressures to 973 K and 200 MPa 127
Hydrolysis
Phase behavior and reaction of polyethylene terephthalate–water systems at pressures up to 173 MPa and temperatures up to 490C 229
Inorganic compounds
Supercritical antisolvent precipitation of micro- and nano-particles 1
K_b
Deuteration of hexane by ^2HCl in supercritical deuterium oxide 165
Kinetics
Ammonolysis with supercritical NH_3 157
Levisticum officinale Koch.
Supercritical CO_2 extraction of the main constituents of lovage (*Levisticum officinale* Koch.) essential oil in model systems and overground botanical parts of the plant 51
Limonene
Phase behaviour of essential oil components in supercritical carbon dioxide 117
Liquid carbon dioxide
Extraction of essential oil and lipids from nutmeg by liquid carbon dioxide 253
Local density
Interpretation of solubility and solvation of phenol blue in supercritical carbon dioxide based on solute–solvent interaction evaluated by solvatochromism 23
Lovage
Supercritical CO_2 extraction of the main constituents of lovage (*Levisticum officinale* Koch.) essential oil in model systems and overground botanical parts of the plant 51
Methanol/water mixture
Raman spectroscopic studies on hydrogen bonding in methanol and methanol/water mixtures under high temperature and pressure 73
Methylcyclohexane
High-pressure density and viscosity of polystyrene solutions in methylcyclohexane 261
Micronization processes
Supercritical antisolvent precipitation of micro- and nano-particles 1
Modelling
Formation of small organic particles by RESS: experimental and theoretical investigations 79
New solvent
Supercritical CO_2 as a solvent for polymeric stone protective materials 173
Nickel-base alloys
Factors controlling corrosion in high-temperature aqueous solutions: a contribution to the dissociation and solubility data influencing corrosion processes 205
Nucleation theory
Formation of small organic particles by RESS: experimental and theoretical investigations 79
Nutmeg
Extraction of essential oil and lipids from nutmeg by liquid carbon dioxide 253
Partial molar enthalpy
Determination of selectivity for parallel reactions in supercritical fluids 63
Partial molar volume
Determination of selectivity for parallel reactions in supercritical fluids 63
Partition coefficient
Partition coefficients of aromatic organic substances in two-phase mixtures of water and carbon dioxide at pressures from 8 to 30 MPa and at temperatures of 313 to 333 K. Part II 109
Partition coefficients
Phase equilibrium of fish oil ethyl esters with supercritical carbon dioxide 35
Peng–Robinson equation of state
Phase equilibrium of fish oil ethyl esters with supercritical carbon dioxide 35
Penicillin G
Solubility of the antibiotic Penicillin G in supercritical carbon dioxide 183
PET
Phase behavior and reaction of polyethylene terephthalate–

water systems at pressures up to 173 MPa and temperatures up to 490C 229
Pharmaceutical compounds
Supercritical antisolvent precipitation of micro- and nano-particles 1
Phase-behaviour
Formation of small organic particles by RESS: experimental and theoretical investigations 79
Phase behavior
Phase behavior and reaction of polyethylene terephthalate–water systems at pressures up to 173 MPa and temperatures up to 490C 229
Phase behaviour
Phase behaviour of essential oil components in supercritical carbon dioxide 117
Phase equilibria
Partition coefficients of aromatic organic substances in two-phase mixtures of water and carbon dioxide at pressures from 8 to 30 MPa and at temperatures of 313 to 333 K. Part II 109
Phase equilibrium
Phase equilibrium of fish oil ethyl esters with supercritical carbon dioxide 35
Phenol blue
Interpretation of solubility and solvation of phenol blue in supercritical carbon dioxide based on solute–solvent interaction evaluated by solvatochromism 23
α-Pinene
Phase behaviour of essential oil components in supercritical carbon dioxide 117
Polymers
Supercritical antisolvent precipitation of micro- and nano-particles 1
Polystyrene
High-pressure density and viscosity of polystyrene solutions in methylcyclohexane 261
Preferential clustering
Thermodynamic studies of chemical equilibrium in supercritical carbon dioxide-cosolvent solutions using UV-Vis spectroscopy 135
Raman spectroscopy
Raman spectroscopic studies on hydrogen bonding in methanol and methanol/water mixtures under high temperature and pressure 73
RESS experiments
Formation of small organic particles by RESS: experimental and theoretical investigations 79
Selectivity
Determination of selectivity for parallel reactions in supercritical fluids 63
Solid–liquid–gas equilibrium
Solid–liquid–gas equilibrium by cubic equations of state and association 97
Solubility
Interpretation of solubility and solvation of phenol blue in supercritical carbon dioxide based on solute–solvent interaction evaluated by solvatochromism 23
Supercritical CO_2 extraction of the main constituents of lovage (*Levisticum officinale* Koch.) essential oil in model systems and overground botanical parts of the plant 51
Phase behaviour of essential oil components in supercritical carbon dioxide 117
Solubility of the antibiotic Penicillin G in supercritical carbon dioxide 183
Factors controlling corrosion in high-temperature aqueous solutions: a contribution to the dissociation and solubility data influencing corrosion processes 205
Solubility measurement
Supercritical CO_2 as a solvent for polymeric stone protective materials 173
Solvation number
Interpretation of solubility and solvation of phenol blue in supercritical carbon dioxide based on solute–solvent interaction evaluated by solvatochromism 23
Stone protection
Supercritical CO_2 as a solvent for polymeric stone protective materials 173
Superconductors
Supercritical antisolvent precipitation of micro- and nano-particles 1
Supercritical antisolvents
Supercritical antisolvent precipitation of micro- and nano-particles 1
Supercritical carbon dioxide
Interpretation of solubility and solvation of phenol blue in supercritical carbon dioxide based on solute–solvent interaction evaluated by solvatochromism 23
Determination of selectivity for parallel reactions in supercritical fluids 63
Partition coefficients of aromatic organic substances in two-phase mixtures of water and carbon dioxide at pressures from 8 to 30 MPa and at temperatures of 313 to 333 K. Part II 109
Supercritical CO_2 as a solvent for polymeric stone protective materials 173
Supercritical CO_2
Phase equilibrium of fish oil ethyl esters with supercritical carbon dioxide 35
Supercritical CO_2 extraction of the main constituents of lovage (*Levisticum officinale* Koch.) essential oil in model systems and overground botanical parts of the plant 51
Thermodynamic studies of chemical equilibrium in supercritical carbon dioxide-cosolvent solutions using UV-Vis spectroscopy 135
Supercritical deuterium oxide
Deuteration of hexane by ^2HCl in supercritical deuterium oxide 165
Supercritical extracting cycles
Energy analysis of supercritical carbon dioxide extraction processes 145
*Supercritical extracting cycles*145*
Energy analysis of supercritical carbon dioxide extraction processes 145

Supercritical fluid
The density of hydrogen fluoride at high pressures to 973 K and 200 MPa 127
Solubility of the antibiotic Penicillin G in supercritical carbon dioxide 183
Supercritical fluid extraction
Supercritical fluid extraction of 1-butanol from aqueous solutions 245
Supercritical fluids
Phase behaviour of essential oil components in supercritical carbon dioxide 117
Supercritical methanol
Raman spectroscopic studies on hydrogen bonding in methanol and methanol/water mixtures under high temperature and pressure 73
Supercritical reaction
Ammonolysis with supercritical NH_3 157
Supercritical water
Modelling of the pyrolysis of tert-butylbenzene in supercritical water 191
Factors controlling corrosion in high-temperature aqueous solutions: a contribution to the dissociation and solubility data influencing corrosion processes 205
Phase behavior and reaction of polyethylene terephthalate–water systems at pressures up to 173 MPa and temperatures up to 490C 229
Supersaturation
Formation of small organic particles by RESS: experimental and theoretical investigations 79
Tautomerism
Thermodynamic studies of chemical equilibrium in supercritical carbon dioxide-cosolvent solutions using UV-Vis spectroscopy 135
Terephthalic acid
Phase behavior and reaction of polyethylene terephthalate–water systems at pressures up to 173 MPa and temperatures up to 490C 229
Thermal decomposition
Modelling of the pyrolysis of tert-butylbenzene in supercritical water 191
Thermodynamics
Thermodynamic studies of chemical equilibrium in supercritical carbon dioxide-cosolvent solutions using UV-Vis spectroscopy 135
Viscosity
High-pressure density and viscosity of polystyrene solutions in methylcyclohexane 261
Visual microscopy
Phase behavior and reaction of polyethylene terephthalate–water systems at pressures up to 173 MPa and temperatures up to 490C 229
Water cage structure
Raman spectroscopic studies on hydrogen bonding in methanol and methanol/water mixtures under high temperature and pressure 73
